

Charter Fund 5 - open for business

With 126 projects already supported by the Digital Participation Charter Fund, we're delighted that the Scottish Government and BT are investing a further £175,000 to:

- support working age people by increasing financial capability, employment and other economic outcomes
- support older and disabled people to reduce social isolation and loneliness.

Funds will be weighted 75/25 towards the first aim and the all-important closing date is 5pm 31 August 2017.
